

MODEL: WM-246 A

### Technical Specifications:

|                                 |                                     |
|---------------------------------|-------------------------------------|
| Maximum thickness of work piece | 10-50mm                             |
| Edge (Tape) Thickness           | 0.4 to 3mm                          |
| Glue Pot Capacity               | 3 Kgs.                              |
| Heating Element                 | 3 Kw                                |
| Mechanism for tape cutting      | Pneumatic (Automatic)               |
| Control of tape cutting         | Micro switch on table & foot switch |
| Glue can be applied             | Tape & Board (Both)                 |
| Machine can be run on           | Two Speeds by shifting the belt     |
| Front table adjustment for tape | 2 mm removable strips               |
| Machine dimensions (LxBxH)      | 1700x1150x1000mm                    |
| Machine Weight                  | 400 Kgs.                            |
